# MINING, BUSINESS AND STOCKS

# SEVIER CON. NOW SUSTAINS ITSELF

President Seymour W. Tulloch Makes This Pleasing Statement About Gold Mountain Mine.

#### MILL RUNNING SATISFACTORY.

Mine Conditions Were Never as Good As Now-High Grade Ore

Found.

The Sevier Consolidated mine, altnated in the Gold Mountain mining district, is making a very good account of itself and Seymour W. Tulloch, the president of that corporation who is in the city today, believes the day is past when shareholders will have to go down in their pockets for funds to keep things going. The present management has had a long hard pull to get matters shaped up as they should be, but Mr. Tulloch says the mill is now more than keeping up expenses and it is not yet running at full tilt. However, it probably will be within the next 20 days. Another conical classifier was shipped to camp today and when it is installed, the plant will run at its capacity, which should be

run at its capacity, which should be about 125 tons a day.

"Everything about the plant is working beautifully." Is the way Mr. Tulloch put it when seen by a "News" representative today. The door classifier, installed recently, is giving splendid satisfaction and the sands are so free from slimes that two tons of material per hour can be handled through the hig tanks built especially for this plant. big tanks built especially for this plant. These tanks are 14 feet high and 14 feet long and are supposed to hold 80 tons of ore at one time. The tailings show a recovery of all but about 40 cents a ton in gold. The battery of the recovery of gold on the plates in that department of the plant is very good and the 8th and 9th inst. were the record days since the mill began the treatment of ore. Mine conditions are also reported to

be satisfactory by Mr. Tulloch and the rich streak found last week in the eastern part of the property and from which assays of \$2,000 to the ton in gold were obtained, has widened out to about 18 inches, with the values somewhat reduced. This ore is being sacked for shipment direct to the smelters. Near the point where this discovery was made Supt. Foster reports having opened up a vein of high grade silver opened up a vein of high grade sliver ore containing particles of native metal. He is not into it far enough, however, to determine just what it will amount to. Nevertheless, it looks encouraging. This is the first ore of this kind found in the property by the present management yet the former owner of the second of the se the mine, Charles Lammersdorf, knew of its existence.

Development work carried on in the western part of the property has been rewarded by the opening of another streak of high grade ore and a sample assayed showed values of about \$3,000 to the ton. The first shipment of gold cyanides from the Sevier Con., mill were shipped to this city today.

#### WEEK ON EXCHANGE.

Business Brisk Among the Brokers-Closing Quotations and Sales,

This has been a busy week on the loor of the Salt Lake Stock & Mining exchange, and when today's call closed the record of Secy. Shorten, showed that a total of 518,520 shares had been transferred for \$149,515.02, against 130,524 shares for \$29,093.75 during the same period a year ago. There has been a good demand for speculative stocks and considerable trading in those of a higher class. Little Chief made the sensational advance of the week, the stock selling up to 20 cents a share. Daiy Judge stiffened slightly at the be-ginning of today's call on the strength of the company's dividend amounce-ment, but this was only momentary, as the last sale was quoted at \$1.12½. Nevada Hills is down again, while May Day closed in somewhat better tone.

BALAKLALLA SMELTER.

Capt. MacVichie Says Steel for Plant

Is Arriving.

Capt. Duncan MacVichie, managing director of the Bingham Consolidated properties, returned last evening from a trip to the Balaklalla mine in Shasta ounty, California, over which he exercises the same function.

At the present time the management is particularly interested in seeing the new smelter completed as soon as pos-sible. The work of construction, the captain said today, is progressing very satisfactory; the spur from the tracks of the Southern Pacific company has been completed and Manager Robert White is about ready to begin the construction of the new tramway. The steel for the smelter building, also some equipment, has begun to arrive.

### LOUISA FISSURE.

Utah Apex Develops a Good Body of \$30 Ore.

Recent advices from the Utah Apex mine indicate that what promises to be a very large body of high grade ore has been located in the vicinity of the uisa Fissure, says the Bulletin of

The drift disclosed, was for a considerable distance in ore which averaged \$20 to \$30 per ton. It has now entered The Utah-Apex has resumed the shipment of ore to the custom smelters. About 1,000 tons had accumulated the dump and it was found advisable to send this forward by team to

Work on the company's new aerial tramway is going ahead rapidly, and should be completed at an early date, thus enabling the company to ship 100 to 200 tons of ore daily. On such a production there will be a substantial net profit to the com-

Three cars of ore from the Montezuma property at Bingham were at the smelters Monday and another car is being loaded for the market. Manager Peter Porter says that not less than 200 tons of ore will be sold this month. Nearly that much was marketed in August, though the first car was not ready until the 8th of the month and there were several days that it was impossible to get teams to do hauling from the mine to the railroad.

L. R. Moser, manager of the Mystic Shrine, returned from Denver early in the week and left immediately or Oregen where he has gone to inspect some mining property. The local manager will be absent about two months and upon his return a campaign of development will be inaugurated at the Mystic Shrine. It is the inention of the management to sink on he vein which was opened up some

### LITTLE CHIEF ASSESSMENT.

The directors of the Little Chief Mining company at a meeting yesterday afternoon decided to call on shareholders again for more money and ac-cordingly an assessment of a cent a share was levied on the outstanding stock. The mine is in need of new hoisting equipment and this means was taken to get speedy action. It is the intention of the directors to install a new plant capable of operating the mine to the depth of 1,000 feet.

### SUES FOR BIG SUM.

N. J. Catrow has been made defendant in an action filed in the district court by J. J. Snider to recover \$20,750, alleged to be due as commission for the sale of certain mining claims in Bing-bun owned by Catron. The claims made will have more when the returns are

# HOW A HAILEY MAN MADE GOOD

H. E. Miller Relates Some Incidents Relative to Yerington Mine Development.

DOUGLAS LOCATED

Which He Recently Sold to a Salt Lake Syndicate-Characteristics of Camp.

being manifested in the development of the Yerington copper district in western Nevada, incidents which have promising field cannot be out of place,

The Yerington region is of consider. son that it may be styled as a Salt Lake camp. Salt Lake mining men were among the first to recognize its possibilities and they have not been slow in getting hold of some of the ake capital has already been invested at Yerington by the hundreds of thousands of dollars and many more will be xpended during the next year for deelopment and equipment purposes, preparatory to extensive production nd some of the best mining engineers in the country have staked their reputations on it that those who have pinned their faith in the district, will see millions returned where thousands have been invested.

A representative of the "News" had an inferesting talk a few days ago with H. E. Miller, whose home is at Hailey, Ida. Everybody in Hailey knows Mr. Miller, but outside of his home town and portions of western Nevada his acquaintance is probably limited; Nevertheless, he is one of the most thorough mining men in west. He is modest and unassuming in his ways and has always been inclined to shrink from getting his name in the newspapers. However, he consented to tell the "News" how happened to go to Yerington, where he has enjoyed a full measure of success, although admitting that had he held onto some of the things he parted with a little longer, he would have been considerably better off in the long run. But he has made a hand-some fortune as it is and has no regrets to offer. When he makes a bargain he sticks to it and if the other party to it makes money he is glad

A half dozen years ago the lead-silver mines of Hailey were inactive; the camp was practically dead and al-though it offered then, as it does now, very good inducements for the invest-ment of capital, the investor turned a deaf ear to it. Halley had no mines.
The east wanted copper and Mr. Miller concluded that the west would have to supply the demands of the east. The "copper boom" was getting under a od head of steam, so he struck out to find a copper mine. Having heard something about Yerington, Mr. Miller headed that way and landed there apparently at the right time, for up to that time there had been nothing doing in the way of developing the mines except in a desultory sort of way. Several weeks were used up in energetically investigating the country and the longer he remained the more convinced was he that Yerington would some time achieve considerable fame as a copper mining camp. Consequently it was in order to acquire a foothold and when Mr. Miller wound up, his stakes were conspicuously present on both slopes of the West Walker range of mountains,
Among his first acquisitions was the

Bluestone mine, which he later sold to Capt. Delamar, who is now operating it and who recently placed in successful commission an electolytic concentrator for the treatment of the low grade ore

of that property.

Soon after his acquisition of the Bluestone, Mr. Miller relates, he went over to the west side of the range and, by doing so, discovered the fact that a huge granite belt, probably two miles in width, separated the mineralized zone. The ore occurs in a lime-stone formation on both sides of the range, but the west section is characterized by a vein system not so pronounced on the other side, where, he explains, is situated a lens-shaped ore body about two miles in length and one and a half miles in width, the area covering about all the copper deposits of consequence in the eastern section which contains the Bluestone, Mason Valley Copper, Copper Deposit, Dyer and several other properties. This great deposit is bounded on the north by a large porphyry belt and on the south and west by a granite formation.

While there has been considerable high grade ore developed in the east section the deposits do not, according to Mr. Miller, come up to the grade characteristic of the west section, as shown particularly in the Douglas property which recently formed the basis for the organization of the Ne-

vada-Douglas Copper company.

Mr. Miller was the locator of and recently sold this property to the syndicate which formed the foregoing named company, which he did after visiting the abandoned stopes of the Ludwig mine, probably the oldest pro-ducing copper mine in western Neva-da. After doing this he went up on the surface to survey the situation and apparently walked over acres of copper outcrop. He staked off 20-odd lode claims and, with the exception of one side, completely surrounded the Ludwig company's ground. Although the Ludwig was located as far back as the '60s, when shipments of bluestone were made to the mills around Virginia City, the owners neglected to fortify selves against newcomers, and left the way open to Mr. Miller to locate the Douglas ground. Naturally, the management of the Ludwig is not inclined to be neighborly, although they have had no one to blame but themselves in sleeping on their opportunities.

#### TAKES HOPEFUL VIEW. Demand for Good Stocks Continues-

Coppers in Special Favor.

William H. Tibbals takes a very hopeful view of the market for mining stocks, and looks for a brisk fall business, due to the general prosperity pre-vailing all over the country.

"While some investors seem inclined to take profits," said Mr. Tibbais today, to take profits," said Mr. Tiobais today, "which is usually a safe course, there is a demand for good stocks that is stimulating the whole market. The record of the transactions on the local exchange this week shows an increasing demand for good stocks. There is also a strong speculative tendency.

"Mining is greatly stimulated by the good prices paid for metals, and there is no indications of any decrease in the demand for the products of our

The people have money this fall and

importations of gold, and the greater confidence in mining investments are bound to give us a very prosperous season. Investors are inquiring for good copper stocks especially.

Few Days.

# SECOND SHOVEL COMING.

Will Reach Boston Con. Mine in a

Mines Manager Louis A, Cates of the Boston Consolidated Mining company, is in from Bingham today and reports that the second steam shovel to be Enormous Dealings in Reading operated on the property of that cor-poration will arrive in a few days. Mr. Cates says the Copper Belt railroad And Its Buoyancy Didn't Strengthen List. ontinues to give very unsatisfactory ervice to its patrons of the camp.

Contract for Equipment to be Made in

Mark B. Kerr, general manager o Montana Tonopah mine, returned to Tonopah from San Francisco, where he has been in the interests of the big mill the company is about to erect, says the Sun of Tonopah. Mr. Kerr stated that everything is moving along smoothly with the project and that the contract for the mill equipment would se let in a day or two, as the bids are practically all at hand.

MONTANA'S NEW MILL.

Few Days.

The grading of the mill site is going on steadily, and much in this line has already been accomplished. The station in the shaft, from which the drift to bottom the ore dump will be run, is partially completed, but it is rather slow work, as great care must be exercised in order to prevent damage to the shaft. Throughout the mine work n blocking out ore bodies and generally preparing the property for a is being prosecuted vigorously. The result of the new work in the Montana has been to increase the output of shipping ore nearly 30 per cent over the average heretofore, though Mr. Kerr states that no effort made to get out an extra quantity of high grade ore.

## SIGNAL PEAK ANNUAL.

Old Officers Chosen at Annual Election in Richfield.

Manager J. H. Nelson and Al Rowley ame down from Gold Mountain Monday to attend the annual meeting of the stockholders of the Signal Peak mining company, says the Reaper of Richfield. They brought a very en-couraging report of conditions at the property. The new formation struck in the tunnel is the same as that which cases the vein followed for over 200 feet in the upper workings. It is not feet in the upper workings. known how thick this casing may be extended, but according to the report of an engineer who has recently examined the ground should not be over 200 feet and possibly not over 50 feet.

At the meeting the old board of directors were re-elected, as follows: D. D. Hanks, president; Ai Rowley, vice president; E. E. Hoffman, secretary and treasurer; J. H. Nelson and W. C.

lt kas decided to continue work right along to tap the veins. The company is in good, healthy condition and the outlook is very hope-ful, with the prospect of some very important news coming from that prop-

#### DALY JUDGE DIVIDENDS.

Big Park City Company Will Soon Inaugurate Quarterly Payments.

Some interesting information ome from the offices of the Daly Judge Mining company. A meeting of the board of directors of that corporation was held yesterday afternoon when the matter of dividends came up for con-sideration and it was decided to set Jan. I as the date of the initial quarterly I as the date of the initial quarterly payment. Just what the amount will be is a matter to be determined later, however, it will be no less than 30 cents a share, \$90,000, or equal to \$380,000 annually; but the chances are the amount will be more, as the company is making splendid headway, netting during the present year about \$45,000 monthly on its operations. At the beginning of the year the company was in debt to the year the company was in debt to the amount of \$231,000. This was cleared up last June and the treasury now contains something over \$100,000.

## CONCENTRATES.

Fred Bowler, a prominent mining man of Johnnie. Nev.. is in the city on a brief business trip.

Sidney Reeves, chief clerk at the mine offices of the Consolidated Mercur company is in from camp today.

M. J. McGill, president of the New York Benanza Mining company, is down from Park City on company busi-

Goldfield brokers are predicting dividends from the Jumping Jack and Stray Dog minet of Manhattan by Christmas Manager Prosser of the smelting

department of the United States Smelt. ing, Refining and Mining company, has returned from a trip east,

The ore and bullion settlements reorted late yesterday by McCornick & Company were: Crude ore and concentrate, \$40,000; base bullion, \$50,000.

J. B. Graham, one of the directors of the Nevada Gold Butte Mines company at Gold Butte, Nev., expects to

leave for Michigan early next week. William S. Cleaves and other directors of the Sheba mine in Humboldt county, Nev., departed for the property of that corporation last night.

Fred Flindt, who recently secured an option on the Dyer property at Yer-ington, Nev., has gone to San Francis-co, on matter connected with this deal. Fred Lyon, Pacific coast manager for

the United States Smelting, Refining and Mining company, has returned to Kennet, Cal., after a visit to the local offices of the company, George E. Gunn, manager of the Cum-

berland-Ely property at Ely, Nev., de-parted for the east yesterday afternoon, to be absent several weeks. It is thought by some that during this trip closer relations will be formed between the Cumberland-Ely and Nevada Consolidated companies. After being idle for several years,

arrangements have made it as reported, for resumption of operations on the Wedge property in the Maryavale section by F. J. Lyon. This has been one of the wonders of the camp in years past and ought to give a finshing account of itself again .- Richfield

GARDNER DAILY STORE NEWS.

# SATURDAY .- The Big Day in the Boys' Clothing Department.

PRICE

Gardner School Suits are as good as men and machinery can make them, and as cheap as they can be sold.

The price is marked in plain figures; you pay the same as anyone else; there is no giving reductions to some under one pretext, to others under another, and to still others for some other reason, while unsuspecting people, who compose the big majority of buyers, pay the highest prices. Our low prices will not admit of

price-cutting tactics—every body's dollar buys a dollar's worth at Gard-If you want the best Suit for your

boy, you will go no farther than this store after comparing goods with Boys' Suits as low as \$1.50, as high

as \$12, with a dozen prices between.
